1. Ideas and Elimination of Idea

The brainstorming event was held via online zoom. First, ideas were tried to be produced by the members of the group within 20-25 minutes. After this process, a vote was made between them (like yes or no). Voting results are given in the figure below [1]. As an explanation of our results, we did not find it appropriate to include all the 'Does not Work' that is written by us, as we thought that it would not be suitable for generation z and would oversimplify the platform. Also, we thought that we could add all of the 'May Work in Future', that we wrote, to the platform as an extra feature. Because, since these are not important enough ideas to create the platform itself, we have kept them separate from the main parts. The 'Definitely Works' things we wrote, are all ideas that will serve as the platform's foundation. Other concepts may be added in the future, but for the time being, the platform will be based on these.
